

avizo Strategic Planning Process

1

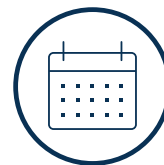

Take one day away to create a one page document that sets the course for your year.

Share the plan with everyone to build a stronger team and make faster progress.

Engage in interactive activities and worksheets to define core values, mission, purpose, and objectives.

Schedule accountability sessions to check on progress through the year.

Through honest conversation, together we will define the most important goals for the year.

Celebrate progress at another Strategic Planning session. Review the past year, reassess unreachable goals, set new foals, and focus for a new year of achievement.
